SUMMARY

I'm a highly motivated full-stack developer, designer and student with an in depth knowledge of Python. I have experience with both Web and Mobile (iOS) development.

EDUCATION

Make School - San Francisco, CA   September 2015 - December 2016
Alternative college program focused on web and mobile application development, and computer science foundations.

UCSC - Santa Cruz, CA   September 2013 - June 2015, January 2016 - June 2018
B.S. in Computer Science

PROJECTS

Portfolio Website - iamkavin.com (HTML, CSS)
Timeboxing App - kavinsub.github.io/timeboxing (HTML, CSS, Javascript)
Give With Us - www.givewith.us (Rails, D3.js)
  ○ A web platform where we aggregate charities of different causes, and users can make donations. I was primarily responsible for the Data Visualizations, and secondarily the backend for socket programming.
Exchange (iOS, Realm)
  ○ An iOS application that allows anyone to seamlessly exchange contact information.

EXPERIENCE

Languages
Python | Java | C | Swift | HTML | CSS | Javascript | Ruby

Frameworks + Technologies
Flask | SQLAlchemy | Rails | Jquery | D3.js | Chart.js | PostgreSQL | Heroku | Realm

Project Euler - Level 2 (top 6%), 59 problems solved so far.
